

Eating Without E. Coli in Boston

An interactive exploration of Food Inspection Violations

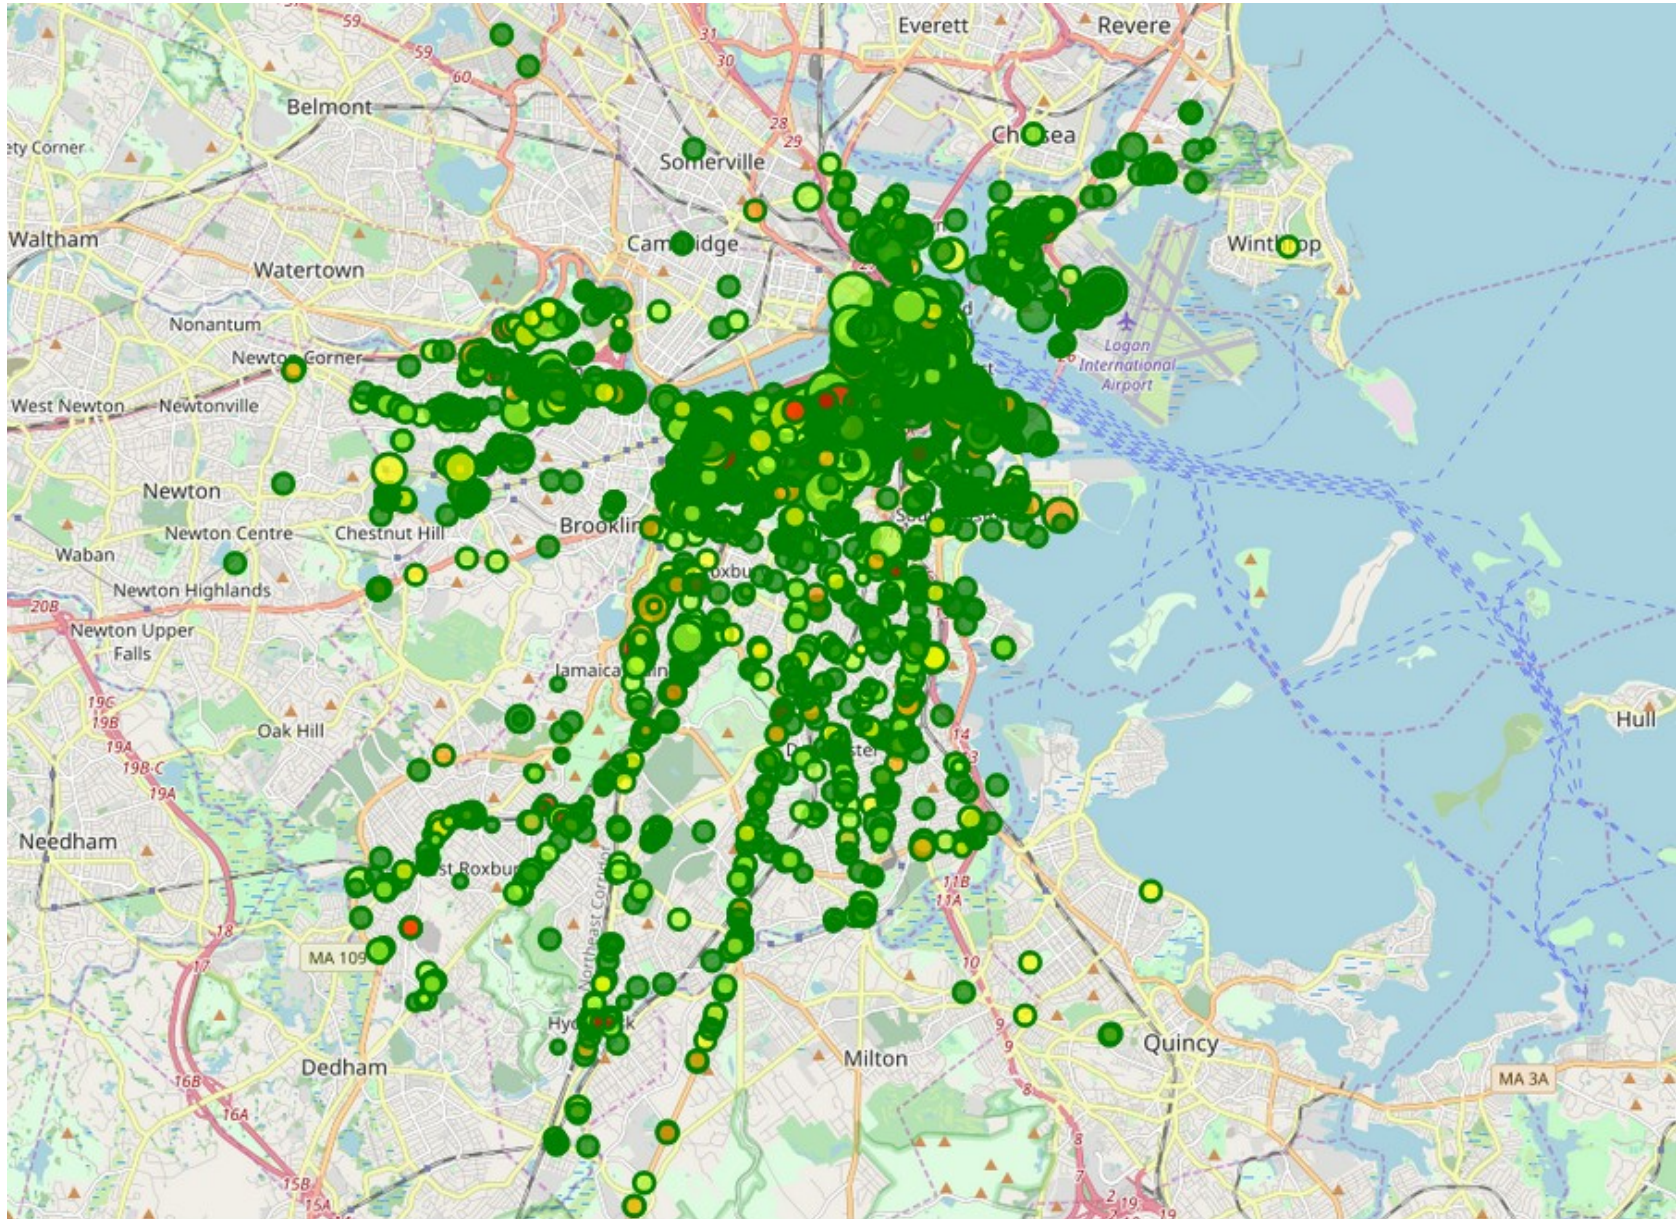

Restaurant violation history provide way to compare your chance of getting sick

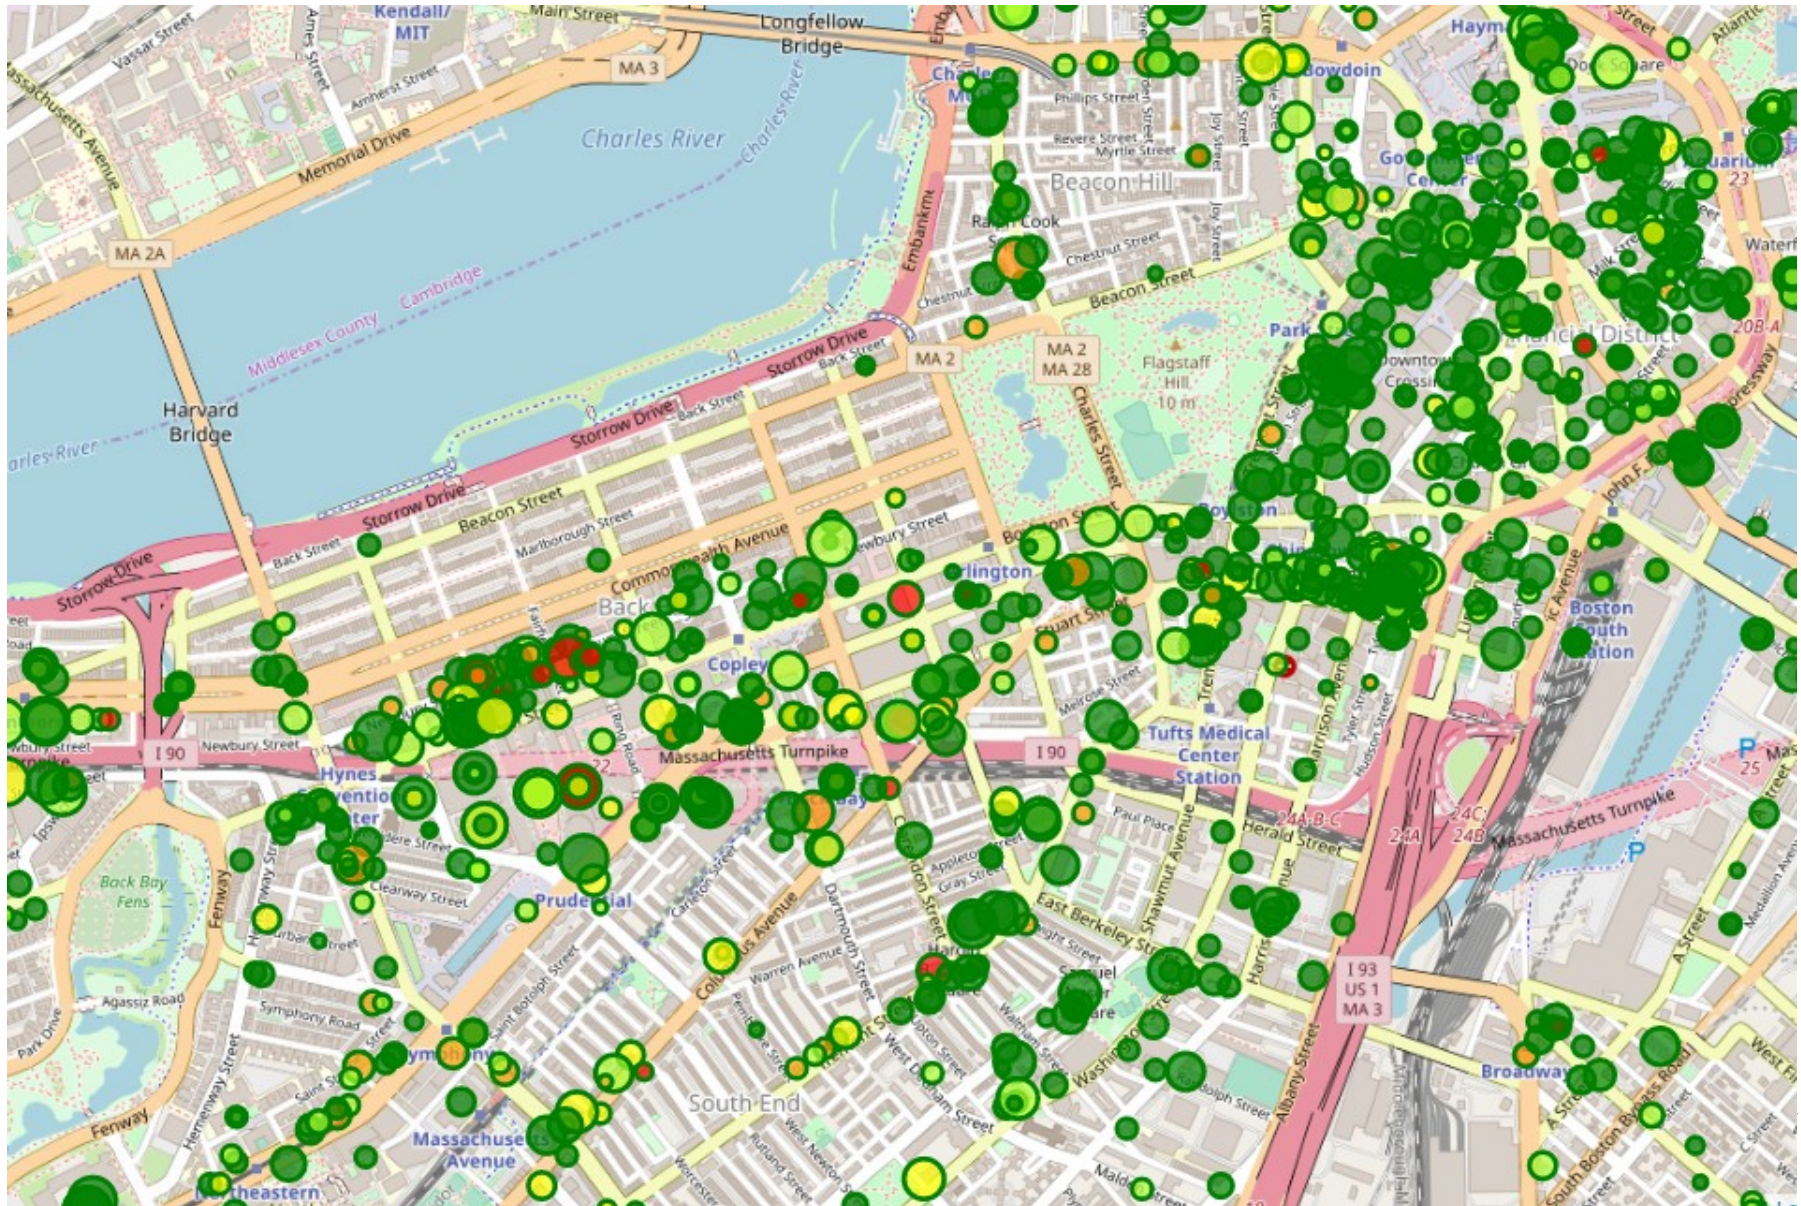

- Food venue violation data from:
- <https://data.boston.gov/dataset/food-establishment-inspections>
- is updated with lat/long geolocation data from Nominatim;
- Combined with venue “likes” from Foursquare; and
- Plotted on an interactive map that shows colors that represent the violation history and sizes that represent the venue’s likes. Markers display all violations for each establishment.

Mapping Food Violations with Folium

Color = Violations, Size = Popularity

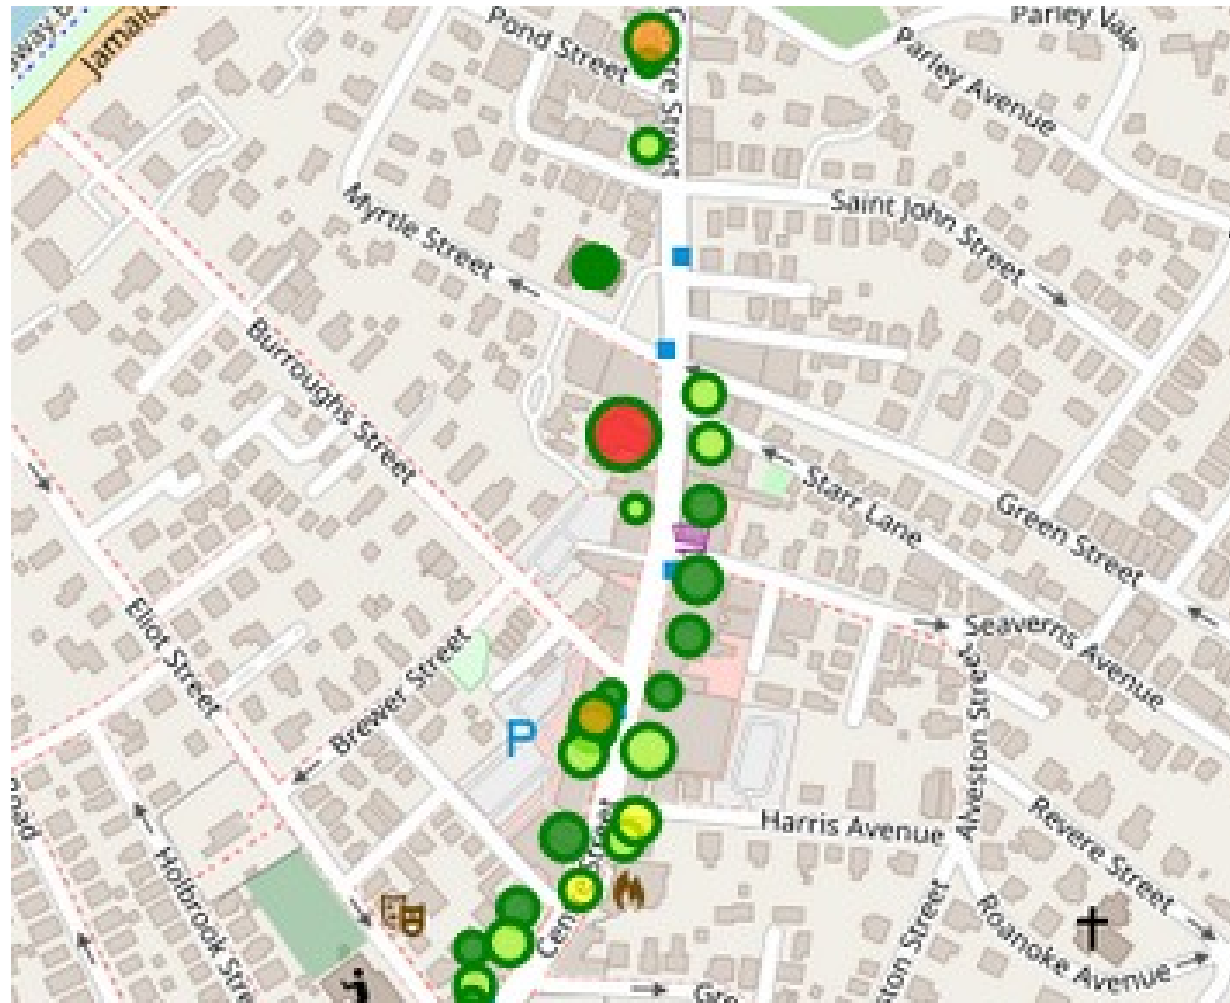

Compare Neighborhoods

Which area would you rather eat at – or open a new business?

Popular places may have a higher chance of getting you sick.

See the past year's violation history for each eating establishment
